Davi Araki

Senior Software Engineer | Typescript | Next.js | React | Frontend
Juiz de Fora, Minas Gerais, Brazil

Summary

Senior Software Engineer with extensive experience in developing and maintaining scalable, user-centric web applications across industries like finance, food delivery, and gaming. Highly skilled in React.js, Next.js, TypeScript, and Redux, I bring a creative problem-solving approach, honed through international projects and board game development. Passionate about leveraging technology to drive innovation and deliver impactful solutions on a global scale.

Experience

SK Intertainment, Inc.
Senior Software Engineer
February 2025 - Present (7 months)

- Led the redevelopment of the frontend for an AI-based chat, focusing on performance, SEO, and overall user experience improvements.
- Migrated the global state management from Context API to Zustand, resulting in better performance and cleaner, more maintainable code.
- Wrote and maintained frontend documentation to standardize development patterns and improve team collaboration.
- Upgraded key libraries, including React Router and Remix, enabling the adoption of new features and aligning the stack with current industry standards.
- Implemented unit testing throughout the codebase to ensure higher reliability and long-term code quality.

CI&T
3 years 6 months
Senior Software Engineer
May 2024 - May 2025 (1 year 1 month)

- Development and maintenance of key features for an AI tool, enhancing its functionality and supporting thousands of users, with React and Zustand.
- Developed and maintained a range of components for the design system using shadcn and Tailwind, contributing to a more consistent and user-friendly interface.
- Implemented unit and end-to-end tests with Vitest and Playwright, enhancing the overall reliability and stability of the application.
- Developed scalable applications using agile methodologies for timely project delivery.

Senior Software Engineer

October 2023 - May 2024 (8 months)

- Spearheaded the development and continuous enhancement of a gamification app front-end for the HR department, leveraging ReactJS to improve user engagement.
- Utilized Redux, TailwindCSS, and Azure to build a responsive, high-performance application, ensuring a seamless user experience across all devices.
- Developed unit tests with React Testing Library and Jest, ensuring robust application functionality and reducing the likelihood of bugs
- Leveraged TypeScript to improve code reliability and maintainability, contributing to the overall stability of the project.

Software Engineer

December 2021 - November 2023 (2 years)

- Development of new features and maintenance of web applications, aimed at rewards program from one of the majors breweries from the world using ReactJS and Next.js, using tools such as Redux for state management, styled-components for css-in-js.
- Impacting the lives of more than 2 Million clients over 15 countries through i18n tool for internationalization
- Led the update of Redux to use the Redux Tool Kit improving maintainability and performance.

Consistently met project deadlines by effectively managing time and prioritizing tasks according to importance.

- Analyzed proposed technical solutions based on customer requirements.
- Development of unit tests with React Testing Library development of end-to-end tests with Cypress
- Refine tasks as a midway between the dev team and the product team
- Implement and utilize Gen AI to improve efficiency.

iFood

Software Engineer

October 2021 - December 2021 (3 months)

- Contributed to the iFood Shop tribe as a contracted Software Engineer, playing a key role in enhancing platform features and user experience.
- Developed and optimized the frontend of a high-traffic platform using TypeScript, Next.js, and React.js, ensuring a robust and user-friendly experience.
- Implemented a Backend For Frontend (BFF) approach with GraphQL, significantly improving data exchange efficiency and enhancing the overall user experience.

Rbm Web - Sistemas Inteligentes

Software Engineer

June 2021 - October 2021 (5 months)

- Developed and maintained key features for financial market web applications using React JS, Redux, React Bootstrap, and GitLab, enhancing application performance and user satisfaction.

• Consistently met project deadlines by effectively managing time and prioritizing tasks according to importance.

• Rebuilt a web app using the latest technologies (Redux Toolkit, Material UI, React Hooks Form, Axios, ChartJs, Styled Components), optimizing processes and improving application efficiency.

• Developed unit tests with React Testing Library and end-to-end tests with Cypress, ensuring high application quality and reducing post-deployment issues.

Creative Game Studios

Board Game Developer

July 2020 - June 2021 (1 year)

Juiz de Fora, Minas Gerais, Brasil

During my time working on Chronicles of Drunagor: Age of Darkness, a high-rated board game, I was responsible for various aspects of its development. I worked on level design, playtesting, and game balancing for heroes and monsters, ensuring an enjoyable and challenging gameplay experience.

As part of my responsibilities, I implemented QR code doors, a feature that added an immersive and unique element to the game. Additionally, I helped set budgets, ensuring the development process remained on track and within financial constraints.

Furthermore, I led the development of the game's website, aodarkness.com, collaborating with a designer to bring their vision to life. My contributions included implementing the website's features, functionality, and user interface, using my skills in web development to enhance the user experience and increase engagement. By delivering a visually-appealing and intuitive website, I helped attract and retain players, ultimately contributing to the game's success.

Overall, my work on Chronicles of Drunagor: Age of Darkness has allowed me to showcase my skills and expertise in various areas of game development. Through my contributions to the game's design, gameplay mechanics, budget management, and website development, I have demonstrated my ability to work effectively and collaboratively within a team to deliver a high-quality and engaging product.

I take pride in my dedication to delivering exceptional results, and I am always looking for new opportunities to challenge myself and further my skills. Whether it be in game development or other related industries, I am confident that my passion and expertise would make me a valuable addition to any team.

Universidade Federal de Juiz de Fora

Researcher at the level of scientific initiation

September 2018 - August 2019 (1 year)

Juiz de Fora, Minas Gerais, Brasil

During my time as a Researcher at the level of scientific initiation at the Universidade Federal de Juiz de Fora from September 2018 to August 2019,

I participated in the development of a game using the React framework, specifically boardgame.io. As part of the project, I utilized jest tests to validate game moves and programmed bots to simulate various game strategies, contributing to the game's overall functionality and success. Through this experience, I was able to gain valuable hands-on experience in game development, React programming, and testing methodologies, while working collaboratively within a team to achieve a common goal.

Histeria Games

Board Game Developer

March 2016 - March 2019 (3 years 1 month)

Juiz de Fora, Minas Gerais, Brasil

During my three-year tenure as a Board Game Developer at Histeria Games, I was pivotal in bringing two board games, "Sonhando com Alice" and "Reinos de Drunagor", to life. These games found successful launches through crowdfunding, with my significant involvement in every step.

For "Sonhando com Alice," my responsibilities spanned game balancing, playtesting, and overall development. I ensured engaging and fair game mechanics that captivated players. In addition, I contributed to the launch campaign on the crowdfunding platform, Kickante.

"Reinos de Drunagor" saw me delving deeper into the intricacies of game development. Beyond game balancing and development, I conceptualized and refined the game's kingdoms. I presented the game at multiple events and conventions, capturing potential players' imaginations.

In addition to the game development aspect, I oversaw the creation and maintenance of our website. This digital extension allowed us to interact with our audience and conduct digital tests for our games, bringing a whole new dimension to our work.

My journey with Histeria Games honed my skills in project management, teamwork, and creative problem-solving, underpinning successful game launches. I take pride in the accomplishments achieved with "Sonhando com Alice" and "Reinos de Drunagor" and am eager to contribute my expertise to future game development endeavors.

Life Equipamentos Eletrônicos Ltda

Development Intership

May 2014 - July 2014 (3 months)

Juiz de Fora, Minas Gerais, Brasil

I was an Intern in Life Equipamentos Eletrônicos and helped the migration of the platform from Delphi 4 to Delphi 7, I also give Client Suport

Education

Universidade Federal de Juiz de Fora

Bachelor's degree, Sistemas de Informação · (March 2017 - March 2020)

Colegio Militar de Juiz de Fora

Ensino Médio Completo · (2002 - 2008)
